

STEERING-GOVERNANCE

PRIYADARSHI 'NANU' PANY

A dashing entrepreneur with a penchant for innovation, Priyadarshi 'Nanu' Pany is a name to reckon with in e-Governance reforms. His smart enterprise CSM Technologies Private Limited has been spearheading path breaking IT solutions in the country by bringing transparency in public service delivery and strengthening good governance principles.

Popularly known as Nanu, he established his presence in the IT field with a determination to take technology to the most common users in India and beyond borders to the developing nations of Africa, the next Land of Opportunities. He started CSM Technologies in 1998 and by the sheer dint of his enterprise and standout performance, he was awarded as the Young Entrepreneur in 2003.

Nanu has single-handedly spearheaded many national and international projects from inception to implementation and been crucial in transforming CSM into a leader in delivering world class services. The pioneering solutions developed by him over the past decade and a half have had a transformational impact on governments, making them transparent, efficient and accountable.

The CMS has given a complete makeover to mining sector, which had been shadowed by the allegations of irregularities and pilferage. The end-to-end solution has made mining completely transparent by monitoring entire activities and tracking from start to finish. Today, the portal has ensured open management of Rs 60,000 crore

economy by monitoring over 50,000 truck movements on a daily basis.

The Student Academic Management System (SAMS) is another application that has totally streamlined the admission and post-admission processes in colleges and ITIs across the state. By an easy, unified online-process, it has put to end to all hassles faced by students, parents and college administrators during admissions.

When internet was just a buzzword, Nanu envisaged and started Odisha's first news portal and e-Commerce website that helped the company earn its Internet niche. Since then, his relentless pursuit for customer satisfaction through a job well delivered, irrespective of the magnitude of the project, is the mantra that the 500+ company still follows.

CSM found its calling in helping Governments to adopt e-Governance solutions for efficient and transparent service delivery and to enhance access and accountability. The organization has designed, developed and implemented more than 100 sector wide solutions in mining, education, transport, land allotment, infrastructure etc. for governments enabling multi-billion dollar transactions.

CSM is well respected for being the first to many unexplored business opportunities. At CSM, Nanu's focus is on highly cost-effective and efficient IT solutions that empower various enterprises across industry verticals with global delivery model, stringent quality processes, industry best practices and highly skilled human resource.
